Published quarterly by the Office of Population Research, School of Public Affairs, Princeton University, and the Population Association of America, Inc.

Communications regarding membership in the Population Association of America, Inc., should be addressed to: Dr. Harold F. Dorn, Secretary, Division of Public Health Methods, U.S. Public Health Service, Bethesda 14, Md.

Communications concerning subscriptions to Population Index should be directed to: Office of Population Research, 20 Nassau Street, Princeton, N.J.

CURRENT ITEMS

THE SAMPLE SURVEYS OF APRIL, 1947

In April, 1947, the Bureau of the Census conducted a sample survey of population, labor force, and housing for the nation and the four major regions. A sample survey was made simultaneously in each of 34 metropolitan areas. The schedule requested information on relationship to head of household; marital status; age; sex; color or race; veteran's status; residence on April 1, 1940 (on a farm, in same house, in same county, in same state, or, if not, name of state or foreign country); education (for all ages, highest grade of school completed, and, for persons aged 5 to 29, school enrollment at any time since March 1, 1947); labor force (information as collected regularly for the Monthly Report on the Labor Force); type of housing, occupancy, and tenure; type of structure, and whether it contains a business unit or is a converted structure; number of rooms; condition of unit; presence or absence of selected modern facilities; monthly rent (for tenant occupied and vacant rental units); and habitability of vacant units. A consumer income schedule was also secured from a representative sample of households.

The Sample

The sample for the national survey included about 30,000 households in areas representing the four broad regions and the country as a whole. Each of the 148 sample areas consisted, in general, of one or more counties, occasionally of parts of counties. For the selection of the sample areas, the counties were classified into some 2,000 primary sampling units. These units were then classified by regions and subclassified into strata according to degree of urbanization, extent of wartime migration, proportion of the labor force engaged in manufacturing, and type of farming. Stratification by type of industry or by color was also utilized in some cases. All metropolitan districts having populations of over 450,000 or containing cities of over 250,000 population in 1940, plus certain others, 41 in all, were established as separate strata and included in the sample areas. One primary sampling unit was chosen from each of the remaining strata. The areas already in the Bureau's Current Population Survey sample were selected to represent those strata which contained such areas. The probability that a particular sampling unit would be selected in a strata was proportional to its population in the 1940 census.

The area sampling method was used in selecting households for inclusion in both the national and metropolitan district surveys. To accomplish this, an indication was obtained of the number of dwelling units in small geographical areas such as blocks, parts of blocks, or similar areas. In the larger urban places, information regarding number and location of dwelling units was obtained from large Sanborn maps, which show the general outline of each dwelling unit. Where such maps were not available, the number of dwelling units in small geographical areas bounded by roads, streams, etc., was determined by field count, or by counting from aerial photographs or county highway maps.

A designated proportion of the small geographical areas within each sample area or minor division was selected for inclusion in the sample. A list of all dwelling units within each of the selected geographical areas was prepared and clusters of six contiguous dwelling units were selected for enumeration. In densely populated and urban areas, for which large-scale maps showing the location of each dwelling unit were available, small areas containing about six dwelling units were delineated and selected directly without the necessity of making a list of dwelling units. In each of the metropolitan districts the sample consisted of about 3,500 private dwelling units and other units in dwelling places, such as rooming houses, hotels, school dormitories, and various types of institutions.

Since the figures for the April surveys are based on samples, they may differ somewhat from the figures that would have been secured if complete censuses had been taken using the same schedules, instructions, and enumerators. The published reports give approximate measures of the sampling variations of the estimates shown. The population reports for metropolitan districts, Series P-21, give approximate measures of the sampling variations for estimates of specific magnitudes dealing with age distribution and school enrollment, migration, type of household and marital status, together with the sampling errors of estimated percentages computed on the basis of the age distribution or migration of the total population and the marital status of adults aged 14 or above. In addition, the basic table on population by age and color carries a footnote that "The chances are 19 out of 20 that a complete census would yield a figure of between ...and...for the total population." Similar reports on the reliability of the estimates in general and the sampling variations in particular are included in the labor force and housing reports. A detailed statement on the variations due to sampling is being prepared and may be obtained on request from the Bureau of the Census.

The Publications

Two releases on the national sample survey have already appeared: "General characteristics of the civilian population of the United States: April, 1947; Preliminary data" (Series P-20, No. 2, issued Sept. 9), and "Changes in number of households and in marital status, 1940 to 1947; Preliminary data" (Series P-20, No. 3, issued Sept. 16). The demographic series will include the final reports of these two preliminary releases, plus reports on school attendance; educational attainment in terms of years of school completed; internal migration, 1940-1947, including gross and net inter-regional movements and farm-nonfarm shifts; maternal and paternal fertility, 1942-1947, in terms of number of children under 5; and characteristics of families, including not only numbers of households but numbers of related groups of families (primary families, secondary families, and sub-families). There will be releases for the nation and the four major regions on characteristics and trends in labor force and housing. The latter will include releases on vacancies, characteristics of dwelling units, state of utilities, rooms, and persons per room.

The reports on the population, labor force, and housing of the separate metropolitan districts were issued as Nos. 1-34 in Current Population Reports, Series P-21, P-51, and P-71. Number 35 in each series was a summary report for all the metropolitan districts sur-

veyed. (See Titles 1710, 2025, and 2023, this issue.) The type of data available in these reports is indicated by the summary lists of tables which follow:

Population, Series P-21

1. Age and color, by sex: 1947 and 1940 (Under 14, 14-19, 20-24, 25-34, 35-44, 45-64, 65+).
2. Male veterans of World War II, broad age groups.
3. Type of households, with heads by sex.
4. Marital status of persons 14 years old and over, by sex.
5. School enrollment by age and sex: 1947 and 1940.
6. School enrollment by age and veteran status.
7. Type of school of persons 7-29 enrolled in school, by sex.
8. Migration, April, 1940, to April, 1947, by sex.
9. Private households by color and sex of head.
10. Percent distribution of private households with male head, by marital status, age, and veteran status of head.

Labor Force, Series P-51

1. Employment status of civilians 14 years old and over, by sex: 1947 and 1940.
2. Percent distribution by labor force status for civilians 14 years old and over, by age and sex: 1947.
3. Major occupation group of employed civilians 14 years old and over, by sex: 1947 and 1940.
4. Major industry group of employed civilians 14 years old and over, by sex: 1947 and 1940.
5. Class of worker of employed civilians 14 years old and over, by sex: 1947 and 1940.
6. Percent distribution by employment status for civilian males, by veteran status.

Housing, Series P-71

1. Occupancy and vacancy of all dwelling units.
2. Characteristics of dwelling units by occupancy, tenure, and color: 1947 and 1940 (Color of occupants, type of structure, number of rooms and persons, monthly rent, equipment, etc.).
3. Percent distribution of the characteristics of ordinary dwelling units by veteran and non-veteran households.

National and Regional Trends, 1940-1947

The population of the United States increased 7.9 per cent in the seven years between 1940 and 1947, in contrast to 7.2 per cent in the decade from 1930 to 1940.* The real increase in the last seven

---

* "The figures for 1947...relate primarily to the civilian population. Approximately 253,000 members of the armed forces living off post or with their families on post were included, but all other members of the armed forces were excluded. For simplicity the population covered is called the 'civilian population.'" (Series P-20, No. 2.)

It should be noted that the estimates of the size of the total population and its age distribution are based on the distribution of the 1940 census, vital statistics, international migration data, and statistics on the strength of the armed forces. Thus they are independent of the sample survey.

years was even greater than this census-survey comparison indicates, for the 1947 survey excluded 1,250,000 persons still in the armed forces. The increase of 9.6 per cent for females is perhaps a better measure of the growth that characterized this period.

Population Characteristics, Sample Survey of April, 1947*

Residence, Color, and Age	Civilian Population, April, 1947 (in '000)			Per Cent Change, April, 1940, to April, 1947

Divorced	-	818	1,140	-	31.0	38.6

* U.S. Bureau of the Census. Current Population Reports, Series P-20, Nos. 2 and 3. Sept. 9 and 16, 1947.

Significant internal redistributions of population are indicated by the differential trends of the regions. The Southern states gained only 2.7 per cent between 1940 and 1947, despite their generally high rate of natural increase. The North Central states gained at a slightly less rapid rate than did the nation as a whole, the Northeastern states at a somewhat more rapid rate. The Western states registered an extraordinary gain in total population of almost 25 per cent in seven years. This increase of 3.4 million persons amounted to almost one-third the total national increase of 10.4 million. In absolute terms, however, it was only slightly larger than the 3.3 million increase in the population of the Northeastern states.

The regional redistribution of population reflects the changing

location of economic opportunities and the accelerated movement from farm to nonfarm areas and occupations. Between 1940 and 1947 the urban population increased 12.7 per cent, the rural nonfarm population 14.3 per cent, but the rural farm population decreased 9.6 per cent. Various other special surveys and ration analyses made by the Bureau of the Census in recent years indicate that the major portion of the increase in the rural nonfarm population probably occurred on the suburban fringe of cities and should properly be allocated to urban rather than to rural population growth.

The effect of the high birth rates of the last seven years is revealed most strikingly in the changes in the age structure of the population. (See front cover chart.) Children under 5 were 36.2 per cent more numerous in 1947 than in 1940; children 5-9 were 12.2 per cent more numerous. The aging of the smaller birth cohorts of the depression years resulted in a 9.3 per cent decrease in the number aged 10-14, and a 13 per cent decrease in the number aged 15-19. The increase in both the 55-64 and the 65-and-over group approached 20 per cent. The net balance of the age changes was an increase in the median age of the total population from 29.0 to 30.0.

The composition of families has been changing rapidly during recent years. There has been a marked decrease in the single, but growth in the numbers of the married, the widowed, and especially the divorced. Increasing numbers of married couples in a period of curtailed construction produced serious housing problems. In 1947, approximately one in twelve married couples had not established a separate household but shared living accommodations with others.

The forthcoming releases on the characteristics of the population, labor force, and housing and the analyses of migration and fertility changes will contribute materially to our knowledge of the demography of the war period, in spite of the analytical limitations inherent in the small numbers of the sample survey.

The Metropolitan District Surveys

Precise analysis of trends in metropolitan or urban populations on the basis of the surveys of the 34 districts is barred by the fact that these areas were selected on the basis of size and labor-market interest.* The rough outlines of the evolving metropolitan popula-

---

* The 1940 population of the 34 districts, 42.4 million, constituted 67.4 per cent of the total metropolitan district population as of that date. The districts surveyed were not typical of the total metropolitan population of the United States, however. Again as of 1940, the metropolitan districts surveyed in 1947 included 82.8 per cent of the 7.0 million metropolitan district population of the West, 79.2 per cent of the 26.8 million in the Northeast, 57.0 per cent of the 18.4 million in the North Central states, but only 45.6 per cent of the 10.7 million in the South. They were atypical in size as well as in location. Only Cleveland, Ohio, of the eleven metropolitan districts of one million or more inhabitants in 1940 was omitted, but about half of the districts with 500,000-1,000,000 and with 250,000-500,000 inhabitants were not surveyed in 1947. Two cities, Tulsa, Oklahoma, and Salt Lake City, Utah, were selected from the metropolitan districts of 100,000-250,000. No metropolitan district with a 1940 population of less than 100,000 was included in the 1947 survey.

tions can be sketched, however, since metropolitan districts in which censuses were taken in 1947 included over two-thirds of the metropolitan population and almost one-third of the total population of the United States in 1940.

The concentration of population in metropolitan areas was accelerated during the war and early postwar periods. The population of the 34 districts, 42.4 million in 1940, reached 48.5 million in 1947, a growth of 14.2 per cent. This increase of 6.0 million was equal to 58 per cent of the 10.4 million increase in the total population of the United States. In fact, the increase for all the United States outside these selected metropolitan districts was only 4.9 per cent.

The increases in the populations of individual districts varied widely. The population of Norfolk-Portsmouth-Newport News increased 43 per cent. Increases of 30 per cent or more also occurred in the Washington, San Antonio, Portland, Seattle, San Francisco-Oakland, and Los Angeles metropolitan districts. The Greater New York-Northeastern New Jersey area added more than 990 thousand to its 1940 population, reaching 12.7 million in 1947, but the relative increase was only 9 per cent. The Boston, Pittsburgh, and Chicago districts increased, respectively, 8, 5, and 3 per cent. The decline of 15 per cent in the population of the Scranton-Wilkes-Barre metropolitan district was the only decrease recorded in any of the areas surveyed.

Despite the heavy out-migration from the Southern states, the population of the metropolitan districts within that region grew rapidly. The increase in the districts surveyed was concentrated largely in the border areas of Washington and Baltimore, the naval area of Norfolk-Portsmouth-Newport News, and the Texas areas of Dallas and San Antonio. Hence it may be somewhat atypical of the Southern region as a whole. However, Birmingham increased 23 per cent, Atlanta 13 per cent, Memphis 21 per cent, and New Orleans 11 per cent. In fact, the increase of 1.2 million in the population of the ten Southern metropolitan districts was greater than the total increase of 1.1 million in the population of all the states of the Southern region.

The phenomenal growth since 1940 has been that of the Pacific Coast metropolitan districts. The population of the Los Angeles area increased 1.0 million to reach 3.9 million in 1947; the San Francisco-Oakland area increased 561 thousand to reach 2.0 million. Proportionately, the increases in Seattle and Portland were also high.

It is impossible in the present note to summarize the wealth of detailed information on the population, the labor force, and the housing of the 34 metropolitan areas. Considered as descriptive materials, the published data are a fascinating preview of the situations likely to be portrayed in the 1950 census if the economy continues without a major depression. The research value of these metropolitan district surveys lies in the possibilities they offer for the analysis of the inter-relationships of demographic, economic, and social factors in the metropolitan growth of the war and early postwar years. It must be remembered, however, that the 1940 census was taken one year and seven months before Pearl Harbor, the surveys of 1947 one

year and eight months after the surrender of Japan. There are some special studies that help to bridge the hiatus of the rapidly changing war years, although differences in the populations covered make comparability difficult. For some of the 34 metropolitan districts, estimated civilian populations, by age and sex, as of November 1, 1943, are available from sample tabulations of the data from the registration for War Ration Book Four. (Series P-44, No. 15, July 1, 1944.) The metropolitan areas of Detroit, Norfolk-Portsmouth-Newport News, Los Angeles, Portland, Seattle, and San Francisco-Oakland were included in the Censuses of Congested Production Areas, in 1944, as well as in the sample surveys of 1947. (Series CA, 1944.) These and other statistical surveys of the war years will assist in historical reconstruction. However, definitive analysis and assessment of the changes in fertility, mortality, and migration that characterized the recent period must await the 1950 census.

EUROPE'S POPULATION IN THE INTERWAR YEARS

In January, 1939, the Council of the League of Nations appointed a committee to study demographic problems in their economic, financial, and social setting. The committee held one meeting and approved a plan of work, but World War II prevented systematic international analysis under the direction of the League's committee. Mr. A. Loveday, Director of the Economic, Financial and Transit Department, realized that such analysis would be essential for the determination of policies after the war. Hence he initiated a cooperative arrangement with the Office of Population Research of Princeton University by which that Office undertook an extensive program of demographic research for the League. Four studies were published or projected before the transfer of the League of Nations to the United Nations: The Future Population of Europe and the Soviet Union, Economic Demography of Eastern and Southern Europe, The Population of the Soviet Union, and Europe's Population in the Interwar Years. The last of these studies, which has just been published, completes the League's demographic series. The Population Commission of the United Nations now has the major responsibility for demographic research within international organizations, and there is a permanent research staff in the Population Division of the Department of Social Affairs.

Europe's Population in the Interwar Years, by Dudley Kirk, "... surveys the over-all human resources of Europe as recorded in the population censuses and vital statistics of the interwar period and analyzes the demographic evolution of the continent in the light of past developments and future prospects." (P. ix.) In its analysis of the development of Europe as a single stream transcending many of the political and ethnic differences, the study penetrates below the national level to measure objectively important regional differences in population characteristics within countries and the significant lack of concurrence between socio-economic and political frontiers. The most unique feature of the work is the extensive use it makes of data for more than six hundred administrative units in order to paint this picture of Europe as a continent rather than as a small collec-

tion of states. This mass of material is made manageable by the liberal use of detailed maps throughout the book, the basic data for which are presented in the appendixes. The book supplements and also utilizes the data and analyses of the previous studies on the population prospects of Europe, the demographic correlates of differential agricultural productivity throughout the continent, and the population history and prospects of the U.S.S.R. A substantial portion of the basic data for the nations and provinces of Europe was assembled over a three-year period for the Office of Geography and Cartography of the United States Department of State.

The task of securing geographic, chronological, and statistical comparability in the demographic, economic, and social statistics of twenty-nine nations was a huge one. No ideal solution of the problems posed was possible, for this is an analysis of the published statistics of the 'twenties and 'thirties. An analysis on a continental basis could not achieve the depth and the intricacy possible with the statistics of the most developed nations. Rather it had to approach perilously close to the least common denominator, the data procurable from the most backward statistical system. Estimation and the use of type illustrations contribute substantially to the achievement of an analysis which is Europe-wide, but these techniques can in no case be regarded as even reasonably adequate substitutes for valid and comparable data. In fact, one contribution of Kirk's study is its painstaking documentation of the necessity for improvements in the scope and comparability of national statistics. It should be noted that this documentation is derived from an evaluation of the data for a continent which is far ahead of any other in both the quantity and quality of its statistical data.

It is patently impossible to summarize Europe's Population in the Interwar Years. The treatise is in a sense a summary of the most voluminous demographic literature that has ever existed for any continent at any period of history. Chapters on population distribution and population change are followed by an analysis of the balance of births and deaths. The analysis of migration receives major emphasis, with chapters on overseas migration, international migration within Europe, internal migration, and the balance of migration and migration as a factor in population growth. Changes in fertility, mortality, and migration are then related to objective indices of health, education, economic progress, and ethnic diversity to show the intricate, yet coherent, pattern of development producing basic shifts in weight of population and related power within the continent.

The major contribution of Europe's Population in the Interwar Years is its delineation of the pattern of diffusion of the modern industrial culture of the West. Variations in population density, population change, vital rates, migration, and social and economic characteristics are reflections of geographical and temporal distance from the center of diffusion of the modern economy and technology. In distribution:

> The greatest clusters of population are those of Northwestern Europe in England, Flanders, the Netherlands, and the low Rhine valley. From this center a heavy belt of dense urban and industrial settlement stretches eastward across Germany

through Saxony and Bohemia to Silesia. Beyond Silesia, and as a continuation, a great arc of close rural settlement reaches across Poland and follows the contours of the black earth regions in a grand sweep across Russia and into Siberia. From this axis of thick settlement the population density fades to sparsely populated regions in northern Scandinavia and northern Russia. The Danube valley, though thickly populated, does not have as heavy concentrations, and the Balkan periphery is thinly settled by comparison with the central axis extending the width of Europe from the North Sea to Siberia.

A second axis of population concentration runs up the Rhine valley through Switzerland to Italy, broken, however, by the line of the Alps. Northern Italy is very heavily populated and the area of dense settlement extends down the peninsula but with some fading in the southern areas. Except for a few concentrations France and Spain and Portugal are rather thinly settled by European standards. (Pp. 6-7.)

Each demographic, social, and economic variable studied showed the expected relationships with this basically economic pattern of population distribution. Ethnic diversity appeared to be immune to the impact of the expanding technical culture of the West.

Kirk's analysis of the demographic consequences of World War I indicates that the basic patterns of distribution and change were not altered essentially by that continental catastrophe. He summarizes materials on war losses, birth rates, and migrations during and after World War II, indicating the probability that the demographic patterns of the Europe of the future will represent a generally ordered evolution from those of the past. "The whole world, as well as Europe, is now moving towards goals of material progress and power originally formulated in Western Europe....The old centers of Western civilization, torn by internal strife and no longer the locus of unchallenged political power, inevitably face a period of major readjustment in the postwar world....The loss of exclusive political power does not predicate the loss of that cultural leadership that Western Europe has so long exercized in the world." (Pp. 254, 256.)

Agent in the United States: Columbia University Press, International Documents Service, 2960 Broadway, New York 27, N.Y. 307 pp., 56 maps and charts. Price: $3.50 paper bound, $4.00 cloth bound.]

INTERNATIONAL STATISTICAL CONFERENCES

The twenty-fifth session of the International Statistical Institute was convened in Washington, D.C., September 6-18, 1947, at the invitation of the Government of the United States. The Inter American Statistical Institute, the Econometric Society, the International As-

sociation for Research in Income and Wealth, and the International Union for the Scientific Study of Population met at the same time and place in related sessions. The United Nations convened a World Statistical Congress, which consisted of a series of general meetings designed to focus attention on the statistical needs and activities of the United Nations, the Specialized Agencies, and non-governmental organizations.

The meetings of the General Assembly of the International Union for the Scientific Study of Population were devoted entirely to the reorganization of the Union. (See next Item.) However, contributions in the field of demography were presented at the meetings of the Demographic Section of the International Statistical Institute and at some of the meetings of the Inter American Statistical Institute and the World Statistical Congress. The following papers will be published eventually in the Proceedings of the International Statistical Conferences:

International Statistical Institute:

Aybar, Celal. An experiment in collection of data on population movements in Turkey.

Aybar, Celal. The particulars of Turkish population censuses.

Calitsounakis, Demetrious. Future development of the Greek population.

Chen, Ta. Factors of urban growth in China.

Curiel, Dario. Principles underlying international statistical classification of diseases, injuries and causes of death.

Dedrick, Calvert L. The 1950 Census of the Americas.

Dolanyi, Aloys. Regularities in the proportion of the sexes.

Dublin, Louis I. The mortality experience of the Metropolitan Life Insurance Company, 1911-1946.

Emerson, Haven. Current problems in morbidity research.

Livi, Livio. The birth rate in Italy from 1931 to 1946.

Lotka, Alfred J. Evaluation of the methods of measuring net fertility.

Sauvy, Alfred. Analysis of recent demographic trends with particular reference to the causes and significance of changes in the birth rate.

Sauvy, Alfred. The measurement of demographic and economic phenomena in relation to their definitions.

Savorgnan, Franco. Infant mortality of the first-born and later-born.

Thorsteinsson, Thorsteinn. The first census of population taken in Iceland in 1703.

Whelpton, P. K. The fertility of successive cohorts of women in the United States.

Winkler, Wilhelm. Age distribution and its interrelation with the elements of natural increase.

World Statistical Congress:

Linder, Forrest E. The development of international demographic statistics.

Notestein, Frank W. Analysis of international population problems.

INTERNATIONAL UNION FOR THE SCIENTIFIC STUDY OF POPULATION

Ten years ago a General Assembly of the International Union for the Scientific Investigation of Population Problems met in Paris in connection with an International Congress of Population sponsored by the French National Committee. The Union was composed of thirteen national committees, but the fact that more than thirty countries sent representatives to the Congress indicated the widespread interest in population research.

The Executive Committee of the Union continued to function until the war, although under increasingly difficult conditions. The proceedings of the Paris Conference were issued in eight volumes, and three issues of the journal Population appeared. The national committees of Japan and Hungary were admitted to the Union. But by 1938 many European countries had reduced or suspended payment of their dues, and international statistical activities became virtually impossible after the Munich crisis.

The Union was quiescent during the war. The President, M. Landry, and the Secretary-Treasurer, M. Mauco, successfully resisted German attempts to revive the Union and, especially, to resume publication of Population. However, the offices of the Union were occupied by the Germans. The minutes of the 1937 Assembly and most of the documents disappeared.

After the war M. Sauvy offered the facilities of the Institut National d'Etudes Démographiques to the Union, but the problem of reviving the national committees was complicated. The majority had ceased to function during the war years. Some had been closely affiliated with propagandistic activities. Several members of the Executive Committee, including M. Mahaim of Belgium, Messrs. Edin and Wicksell of Sweden, and Sir Charles Close of the United Kingdom, were dead. Messrs. Landry and Mauco re-established contacts with the surviving national committees and explored the extent of the interest in the Union among demographers in countries without such committees.

A preparatory meeting to consider procedures necessary for the re-establishment of the Union was held in Paris in May, 1947. Warren Thompson, a Vice-President of the Union, was the representative of the National Committee of the United States. It had been hoped that nine countries would participate in the Paris conference, but only France, Italy, the Netherlands, and Hungary, in addition to the United States, were able to send representatives. The major discussion concerned the reformulation of the statutes of the Union. It was this preliminary discussion that provided the basis for holding a reorganization meeting of the Union in Washington in September as one of the international statistical conferences held simultaneously with the meetings of the International Statistical Institute.

Two meetings of the General Assembly were held in Washington, on September 6 and 11. A new constitution was adopted. There were many detailed changes, including the shortening of the name to the International Union for the Scientific Study of Population. The fundamental change, however, involved a shift in the basis of membership from that of national committees to that of individuals chosen on the basis of their scientific contributions. If a country has five or

more members a national committee shall be organized, and its chairman shall represent the national committee before the Union. Such a national committee, however, shall consist of members of the Union who have been admitted as individuals. There is no formal limitation to the number of individuals who may be elected members from any one country, although no country can have more than one-eighth of the total number of votes. General Assemblies of the Union shall be held at least once every three years.

The General Assembly in Washington elected an initial group of members from various countries of the world. Further additions to the membership list may be made for a limited time by the Executive Committee. After the expiration of this period, there are detailed provisions for election by mail ballot.

The Executive Committee of the Union for the Scientific Study of Population as now constituted consists of a President, seven Vice-Presidents, and a Secretary-Treasurer. The persons elected to serve until the next General Assembly are as follows:

President: Adolphe Landry, France
Vice-Presidents: Alberto Arca Parró, Peru
Marcello Boldrini, Italy
Ta Chen, China
David V. Glass, United Kingdom
Liebmann Hersch, Switzerland
Alfred J. Lotka, United States
Stefan Szulc, Poland

Secretary-Treasurer: Georges Mauco, France

UNITED NATIONS' POPULATION COMMISSION, SECOND SESSION

The second session of the Population Commission of the Economic and Social Council of the United Nations was held at Lake Success, August 18 to 27, 1947. The Report of the session was issued on August 29, 1947, as Document E/571.

The Commission re-examined its terms of reference and recommended to the Economic and Social Council that the following somewhat more specific terms be adopted:

"The Population Commission shall arrange for studies and advise the Council on:

(a) The size and structure of populations and the changes therein.
(b) The influence of demographic factors, including migration, on economic and social conditions.
(c) The influence of economic and social conditions on the size and structure of populations, and on the changes therein.
(d) Policies designed to influence the size and structure of populations and the changes therein.

(e) Any other demographic questions on which either the principal or the subsidiary organs of the United Nations or the Specialized Agencies may seek advice."

The Commission assigned highest priority to work on basic population data, with particular reference to the compilation of current population estimates and other materials for the Demographic Year-Book, and to plans for international census projects. The Commission formulated a list of topics which over a period of time should be covered by the Demographic Year-Book and made general recommendations as to geographical and subject-matter coverage. In order to further the development of international census plans, the Secretary-General was requested to call the attention of Member Governments to the need for early and adequate preparatory work for contemplated enumerations, to invite Member Governments to give consideration to and to comment on the "Standard minimum list of subjects proposed for 1950 censuses of population," to urge Member Governments which cannot take complete censuses in or about 1950 to consider the possibility of applying scientific sampling, and to invite Member Governments to send personnel to other countries for study.

The Commission further recommended that plans for studying the inter-relationships between economic, social, and population changes be developed as a means of encouraging studies by interested Member States. It was recommended that work be initiated in the field of the improvement of the comparability and quality of basic population statistics, including the standardization of demographic terminology in the various languages. Both the studies of the inter-relationships between economic, social, and population factors and the standardization of technical terms in the various languages were regarded as important but less urgent than the work on population estimates, the preparation of the Demographic Year-Book, and the plans for international censuses.

Finally, the Commission welcomed the progress thus far made on the studies of the population of Trust Territories but gave a low priority to further work in this field.

There are four Annexes to the Report of the Commission: I. Demographic Year-Book, outline of contents; II. Standard minimum list of subjects proposed for 1950 censuses of population; III. Supplementary list of subjects proposed for optional inclusion in 1950 censuses of population; IV. Priorities for work on population estimates.

Persons wishing to secure a copy of this report should write to the Documentary Service of the United Nations, asking for Document E/571 29 August 1947, and specifying whether they care to have the English or French version.

NOTICE TO SUBSCRIBERS

In an effort to complete their files, the Statistical Offices of many foreign countries have recently written us for back issues of Population Index. In general, we have been able to meet these requests, but in many cases the

requests have not been fulfilled because our stock of certain issues is exhausted.

If you have a copy of any of the back issues listed below for which you have no further use, the Office of Population Research would be glad to purchase it at the regular price of $.75.

Vol. 1, No. 2	Vol. 4, No. 3
Vol. 2, No. 2	Vol. 6, Nos. 1 and 2
Vol. 3, No. 1	Vol. 7, Nos. 1, 2, and 4

BIBLIOGRAPHY

The titles of books and articles not available to the editors and not covered by available reviews or abstracts are marked with the symbol °. If translations, abstracts, or reviews are taken from other sources, the source is cited in brackets at the end of the entry. The following abbreviations are used for common bibliographic sources:

A.S.S.A. - Australian Social Science Abstract.
B.A. - Biological Abstracts.
C.D.A.B. - Child Development Abstracts and Bibliography.
C.G.P. - Current Geographical Publications.
M.L.R. - Monthly Labor Review.
Q.R.C.P. - Quarterly Review of Chinese Publications: Philobiblon.
R.I.I.S. - Revue de l'Institut International de Statistique.
S.B.S.V. - Schweizerische Bibliographie für Statistik und Volkswirtschaft.

The preparation of this bibliography is made possible by the generous cooperation of the staff of the Library of Congress, and especially that of the Census Library Project, in making the numerous excellent facilities of the Library available to the editors. The citations to the official statistics of the Republics of Latin America are prepared in cooperation with the Inter American Statistical Institute; those to the official statistics of other countries, in cooperation with the Office of the Coordinator of International Statistics and the Bureau of the Census.

The distribution of the population in Belgium. A study of social demography. (La répartition de la population sur le territoire belge. Etude de démographie sociale.) Louvain, Editions de la Société d'Etudes Morales, Sociales et Juridiques, 1946. 302 pp.

The territorial distribution of the Belgian people is analyzed and related to economic factors as a basis for determining a sound population policy for Belgium. [Population 2(2):380-381.]

1686. Ogburn, William F., and Nimkoff, Meyer F.
A handbook of sociology. London, K. Paul, Trench, Trubner & Co., Ltd., 1947. xi, 644 pp.

English adaptation, with American materials supplemented by English data. For the American edition, see 7(1):29.

1687. President's Advisory Commission on Universal Training.
A program for national security. Washington, Govt. Printing Office, 1947. 448 pp.

The first section, pp. 1-95, contains the report of the Commission set up by the President to determine whether the security of the country requires the establishment of a system of universal training. The report reviews the world situation, the nature of possible future warfare, and the essentials of an integrated national security program, and outlines a program for universal training. The remainder of the volume contains detailed appendixes. Appendix 4, "Population factors relevant to national security," pp. 161-171, considers the place of Western peoples in the world, population growth in the United States, and the geographic distribution and quality of our population.

1688. Quensel, Carl-Erik.
Population movements in Sweden in recent years. Population Studies 1(1):29-43. June, 1947.

Section 1, "Population movements, 1931-1945," deals with trends in marriages, births, and deaths, and with implications of the changing rates. Section 2, "The reproduction rate in Sweden, 1933 and 1943," includes a discussion of the nature of reproduction rates and proposes as an improved measure of reproductivity "the ratio of the average number of children per marriage resulting from existing fertility to the theoretical number of children per marriage required in a stationary population."

1689. Senior, Clarence.
Population pressures and the future of Puerto Rico. Journal of Heredity 38(5): 131-134. May, 1947.

Population increase, possible solutions to the problem of overpopulation, and the need for a balanced population policy.

1690. Simmons, Ernest J., editor.
USSR, a concise handbook. Ithaca, N.Y., Cornell University Press, 1947. viii, 494 pp.

1691. Sinclair, H. I.
Population: New Zealand's problem. Dunedin, Gordon and Gotch, Ltd., 1944. 189 pp.

1692. Taeuber, Irene B., and Notestein, Frank W.
The changing fertility of the Japanese. Population Studies 1(1):2-28. June, 1947.

"The present report summarizes one segment of a larger study of the evolution of the population of Japan and its relationship to factors of stability and change in physical environment, economy, social structure, and political organization." In this analysis the factor of changing patterns of fertility is emphasized and the implications of the decline in fertility in Japan are pointed out. Population growth is traced during the pre-modern and the early transitional period that ended in 1920, with an accompanying table showing population estimates and vital rates for each year from 1875 to 1919. Data for the period 1920-1943 are analyzed in more detail; the topics considered include regional differentials in fertility, trends in gross reproduction rates by size of city and for non-city localities, and the underlying demographic mechanism of the decline, such as age schedules of fertility and change in age at marriage. The report also contains a description and evaluation of Japanese demographic statistics.

1693. Vance, Rupert B., and Blackwell, Gordon W.
New farm homes for old; a study of rural public housing in the South. With the collaboration of Howard G. McClain. University, Ala., University of Alabama Press, 1946. 245 pp.

This is a study of the Federal Government's rural housing program in the South. Part II, "Human factors in rural housing," includes chapters on mobility, occupation, and income and on the effects of housing on health and initiative.

1694. Vincent, Paul E.
French demography in the eighteenth century. Population Studies 1(1):44-71. June, 1947.

Introductory sections summarize the reasons for studying the demography of eighteenth century France, critically review the early studies of Pierre Levasseur and Alfred Des Cilleuls, and give an estimate of the age distribution of the population about 1775. Succeeding sections trace the development of population statistics in France and consider the methodology that should be used in studying historical demography. As an illustration of the information that may be derived from a study of historical sources, the results of the enumeration of Languedoc in 1697 are presented and discussed.

1695. Vincent, Paul E.
War and population. (Guerre et population.) Population 2(1):9-30. Jan.-March, 1947.

A general consideration of the relations between war and demography, including the effects of war on population and the influence of demographic conditions on the genesis and development of war. Reviews the literature on the subject and contains an estimate of war losses for various countries, 1939-1945. An appendix, pp. 25-30, presents notes and tables clarifying the more general treatment in the text.

1696. Zurcher, Arnold J., and Page, Richmond, editors.
America's place in the world economy. New York, Institute of Postwar Reconstruc-

tion, 1945. xi, 250 pp.

These addresses, delivered at the Fourth Series of Conferences of the Institute of Postwar Reconstruction, include one by Henry P. Fairchild on "World population movements and the United States."

II: FORMAL DEMOGRAPHY

NORTH AMERICA

Canada

1697. Canada. Dominion Bureau of Statistics.

Eighth census of Canada, 1941. Vol. III. Ages of the population: classified by sex, conjugal condition, racial origin, religious denomination, birthplace, etc. Ottawa, Edmond Cloutier, 1946. 838 pp.

General tables give the population, 1881-1941, and by single years of age for 1941; detailed tables classify the 1941 population by age for conjugal condition, racial origin, religion, residence, immigration, mother tongue, education, age at marriage, etc.

1698. Canada. Dominion Bureau of Statistics.

Population of Manitoba, 1946. Weekly Bulletin 15(22). May 31, 1947.

Population of Federal Electoral Districts in the Prairie Provinces in 1946. Ibid. 15(24). June 14, 1947.

Gainfully occupied in Manitoba. Ibid. 15(24). June 14, 1947.

Population of Alberta in 1946. Ibid. 15 (24). June 14, 1947.

Number of Saskatchewan farms down in 1946 from 1941. Ibid. 15(24). June 14, 1947.

1699. Canada. Dominion Bureau of Statistics. Vital Statistics Branch.

Vital statistics, 1944. Twenty-fourth annual report. Ottawa, King's Printer, 1946. 765 pp.

Appendixes: I. Births and deaths amongst the Indian population; II. Vital statistics of Yukon and the Northwest Territories; III. Deaths classified according to whether decedent had medical attention or not, by province and place of residence, 1944; IV. Number of cases of certain notifiable diseases reported in Canada by province, during each month of 1944.

Dominican Republic

1700. Dominican Republic. Dirección General de Estadística.

Demographic statistics: 1943-1946. (Estadística demográfica: 1943-1946.) Ciudad Trujillo, 1947. 130 pp.

For each year, detailed tables of number of marriages, births, and deaths by provinces and communes.

Honduras

1701. Bonilla, Marcelina.

Historical-geographical dictionary of the population of Honduras. (Diccionario histórico-geográfico de las poblaciones de Honduras.) Tegucigalpa, D.C., Talleres Tipolitográficos "Areston," 1945. 256 pp.

Jamaica

1702. Jamaica. Central Bureau of Statistics.

Eighth census of Jamaica and its dependencies, 1943. Population, housing and agriculture. Kingston, The Govt. Printer, 1945. 28, cii, 571 pp.

A list of the 427 tables and the six appendixes precedes the census report itself. Contents are as follows:

Part 1. Administrative report.

Part 2. Introduction to population and housing.

Part 3. Introduction to agriculture.

Part 4. Population and housing tables: 1. Growth of population, place of birth, movement and nationality; 2. Age (Detailed classifications, Tables 21-204); 3. Conjugal condition; 4. Racial origin; 5. Literacy, standard of education, school attendance; 6. Religious denominations; 7. Gainfully occupied and unemployed; 8. Earnings of wage earners during week ending 12th of December, 1942; 9. Housing and households; 10. Blind and deaf mutes.

Part 5. Agriculture tables.

Part 6. Turks and Caicos Islands.

Part 7. Cayman Islands.

Schedules, instructions, census regulations, circulars, etc., are included in appendixes, as are descriptions and maps of census districts.

The administrative report was also published separately. See: Jamaica. Census Office. Administrative report (Part 1 of the census report). Kingston, Printed by the Govt. Printer, 1945. Pp. xxiii, 465-472.

Martinique

1703. France. Service Colonial des Statistiques.

Census of the population of Martinique, 1946. (Recensement de la population de la Martinique en 1946.) Bulletin Mensuel de Statistiques Coloniales, Supplément Série Etudes, No. 13. Paris, Imprimerie Jemmapes, 1947. 34 pp.

The census of May 15, 1946, was based on individual schedules for all groups in the population. A description of organization and a critique of results precede detailed tables on trends by communes, 1847-1946, distribution, broad age groups (1, 1-19, 20-59, 60+), aliens, employed population by occupation, intercensal vital statistics, and migration.

Dates of previous censuses, instructions, and schedule forms are included in an appendix.

United States

1704. Green, Howard W.

Use of census tracts in the analysis of city health problems. American Journal of Public Health 37(5):538-542. May, 1947.

Census tract data for Cleveland relating fertility and infant mortality to socioeconomic factors illustrate the use of such data in studying public health problems.

1705. Harvard University. Graduate School of Public Administration. Bureau for Research in Municipal Government.

Comparative status of 43 cities and towns in the Boston metropolitan commission districts: population; national origins--native; foreign or mixed parentage; foreign born; age groups and sex; school membership; birth and death rates; employment; election data--party votes. Cambridge, Mass., Bureau for Research in Municipal Government, Harvard Graduate School of Public Administration, 1947. 69 pp.

See also: Metropolis in maps; graphic references for the Boston area. Cambridge, Mass., Bureau for Research in Municipal Government, Harvard Graduate School of Public Administration, 1946. vii, 87 pp.

1706. Metropolitan Life Insurance Co.

School-age population to reach new high. Statistical Bulletin 28(6):3-4. June, 1947.

Includes an estimate of school-age population in the United States, 1945 to 1961.

1707. Myers, Robert J.

Long-range cost estimates for old-age and survivors insurance, 1946. Social Security Administration, Office of the Actuary, Actuarial Study No. 23. Washington, 1947. 44 pp.

This report is the fourth in a series of studies in regard to the actuarial costs of the present old-age and survivors insurance program. The factors taken into account in these cost estimates include the new demographic projections of the National Resources Planning Board. There are four cost illustrations: one based on low employment assumptions and one based on high employment assumptions, and each of these divided into illustrations using (1) low cost factors in regard to fertility, mortality, retirement rates, etc., and (2) using high cost factors. The United States population is projected for five-year intervals from 1950 to 2000 for both low cost and high cost assumptions.

See also Title 1708, this issue.

1708. Shudde, Louis O., and Immerwahr, George E.

Old-age and survivors insurance: Analysis of long-range cost factors. Actuarial Study No. 21. Washington, Office of the Actuary, 1946. 138 pp.

The purpose of this study is to provide a general background for understanding the cost factors in old-age and survivors insurance. Includes a detailed analysis of such demographic factors as population trends, 1940-2000, trends in birth rates, mortality and survival rates by age, race, and marital status, immigration, marriage and divorce rates, family composition, and employment status by sex, age, and race.

See also Title 1707, this issue.

1709. U.S. Bureau of the Census.

Census tract material. Third ed., revised and enlarged. Washington, 1947. 14 pp., maps.

Nature, origin, history, data available, uses, etc.

1710. U.S. Bureau of the Census.

Current population reports. Population characteristics. Series P-21. Population characteristics of the...Metropolitan District: April, 1947. Washington, 1947.

"In April, 1947, the Bureau of the Census conducted sample population surveys in a number of metropolitan districts. For each district, three reports are being pub-

lished: Series P-21 which presents general population data; Series P-51, labor force data; and Series P-71, housing data. Figures for the United States as a whole will be presented in separate reports."

No. 1. Washington, D.C. July 23, 1947. 9 pp.

Vital statistics--Special reports. Vol. 27. National summaries. Washington, 1947-.

Nos. 1-2. See 13(3):1189.

No. 3. Deaths and death rates for selected causes, United States, each division and state, 1945. July 24, 1947. Pp. 27-46.

No. 4. Infant mortality by race and by urban and rural areas, United States, each division and state, 1945. Aug. 19, 1947. Pp. 47-54.

1721. University of New Mexico. Department of Government, Division of Research.

The population of New Mexico. Albuquerque, University of New Mexico, 1947. 38 pp.

Part I, "Population trends in New Mexico," by Paul Walter, Jr., deals with the growth of population since 1880, density and distribution, urban trends, the age, sex, and racial composition, and trends in natural increase and migration.

Part II, "The people of New Mexico," by Ross Calvin, is a general, historical description of the type of people who make up the population of the state.

1722. University of Pennsylvania. Institute of Local and State Government. Population and Economic Research Advisory Committee.

The population of Philadelphia and environs, and labor force and employment estimates. A projection for 1950. A report to the Philadelphia City Planning Commission from the Population and Economic Research Advisory Committee. University of Pennsylvania, 1946. Vol. I, 43 and 42 pp.; Vol. II, 109 pp.

In the first volume, Part I, "Population of Philadelphia and environs in 1950," is by Simon S. Kuznets, with the assistance of E. Douglass Burdick, Edward P. Hutchinson, and David T. Rowlands. The population is projected partly upon the basis of actual observation (1940-1944) and partly on the assumption that the "several factors in population change will function during the 1940-50 decade in a way analogous to some comparable period in the recent past." Data are presented on total population growth and on changes in the age and sex structure and racial composition of the population, 1870-1940, and projected for 1940-1950. The final chapter of this section discusses the main sources of the data, the methodology employed, and the underlying assumptions, including methods used to estimate births, deaths, and migration, 1940-1950. The detailed tables of these projections are published in another volume as Part II.

The second section of the first volume, "Labor force and employment estimates for Philadelphia and environs with a projection for 1950," by Gladys L. Palmer and Ann Ratner, considers the place of Philadelphia in the national economy and trends in the labor force since 1900. The 1950 labor force is estimated by age and sex, and the industrial pattern of employment is projected to 1950.

SOUTH AMERICA

Argentina

1723. Argentina. Dirección del Censo Escolar de la Nación.

National school census of April 28, 1943. General results for Tierra del Fuego. (Censo escolar de la nación levantado el 28 de abril de 1943. Resultados generales correspondientes a la gobernación de Tierra del Fuego.) Serie D: No. 25. Buenos Aires, 1946. Separately paged.

This publication completes the series on the general results of the school census, taken in April, 1943, according to the provisions of Law No. 12,723.

The complete list of Serie D is as follows:

No. 1. Resultados generales de toda la República.
No. 2. Capital Federal.
No. 3. Provincia de Buenos Aires.
No. 4. Provincia de Catamarca.
No. 5. Provincia de Córdoba.
No. 6. Provincia de Corrientes.
No. 7. Provincia de Entre Ríos.
No. 8. Provincia de Jujuy.
No. 9. Provincia de La Rioja.
No. 10. Provincia de Mendoza.
No. 11. Provincia de Salta.
No. 12. Provincia de San Juan.
No. 13. Provincia de San Luis.
No. 14. Provincia de Santa Fé.
No. 15. Provincia de Sgo. del Estero.
No. 16. Provincia de Tucumán.
No. 17. Gobernación del Chaco.
No. 18. Gobernación de Chubut.
No. 19. Gobernación de Formosa.
No. 20. Gobernación de La Pampa.
No. 21. Gobernación de Misiones.
No. 22. Gobernación de Neuquén.
No. 23. Gobernación de Río Negro.
No. 24. Gobernación de Santa Cruz.
No. 25. Gobernación de Tierra del Fuego.

For reference to the details of the census, see 10(2):476 and 11(1):356.

1724. González Galé, José.

Social forecast. (Prevision social.) Academia de Ciencias Económicas, Ediciones Especiales No. 11. Buenos Aires, Editorial Losada, S.A., 1946. 218 pp.

The section, "Los seguros sociales en la Argentina, problemas y perspectivas," pp. 59-72, uses Bunge's estimates of the future size of the population in broad age groups, 1938, 1958, and 1988.

Chile

1725. Chile. Dirección General de Estadística.

Population census, 1940. (Censo de población, 1940.) Estadística Chilena 19 (9):546-564. Sept., 1946.

1. Population by occupation and sex. (Habitantes del país, según ocupación y sexo.) Pp. 546-547.

2. Enumeration of the occupations of the population. (Detalle de las actividades de la población del país.) Pp. 547-564. [Detailed classification by sex and age.]

For reference to earlier publications of the census returns, see 13(2):678.

Falkland Islands

1726. Falkland Islands (excluding Dependencies).

Report of census taken on the night of the 31st March, 1946. Stanley, Falkland Islands, Govt. Printing Office, 1946[?]. 20 pp.

Part I, "Census report," gives numbers; sex, marital status; nationality and birthplace; relative ages; occupations; natural increase, 1932-45; migration; and annual vital statistics, 1931-45.

Part II is a social and economic report, not based on census data.

Peru

1727. Peru. Dirección Nacional de Estadística.

Statistical yearbook of Peru, 1944-1945. (Anuario estadístico del Perú 1944-1945.) Lima, Imprenta Americana, 1947. lxxx, 755 pp.

Section II, "Demography," pp. 21-108.

1728. Peru. Dirección Nacional de Estadística.

National census of population and occupation, 1940. Vol. II. Departments: Tumbes, Piura, Cajamarca. (Censo nacional de población de 1940. Volumen II. Departamentos: Tumbes, Piura, Cajamarca.) Lima, Imprenta Torres Aguire, 1947. Separately paged.

This is one of nine contemplated volumes which will include the detailed data of the census on size, distribution, age, marital status, fertility, race, language, education, literacy, religion, labor force status and type of activity, place of birth, defects, families, aliens, and types of settled areas by size.

For reference to Vol. I, "General results," see 11(3):1197.

1729. Peru. Laws, Statutes, etc.

Administrative and political divisions of Peru; summary of laws and decrees, 1821-1946. (Demarcación política del Perú; recopilación de leyes y decretos, 1821-1946.) By Justino M. Tarazona S. Lima, Taller de Linotipia, 1946. 1545 pp.

Venezuela

1730. Venezuela. Dirección General de Estadística.

Commentaries on the seventh census of population of Venezuela. (Comentarios al VII censo de población de Venezuela.) By Juan Alvarado Franquiz. Caracas, Editorial Grafolit, 1947. 90 pp., graphs.

Increase, density, age and sex, civil status, education, social welfare, nationality, occupations, urban-rural distribution, health data.

1731. Venezuela. Dirección General de Estadística.

Demography. (Demografía.) Boletín Mensual de Estadística 6(1-3):3-13. Jan.-March, 1946.

Includes numbers of marriages, births, and deaths, each year 1942-1945.

1732. Venezuela. Dirección General de Estadística.

Seventh national census of population, December 7, 1941. Vol. VIII. General summary. (Séptimo censo nacional de población levantado el 7 de diciembre de 1941. Tomo VIII. Resumen general de la República.) Caracas, 1947. cxx, 489 pp.

A section of general comment and interpretation and a section containing graphic illustrations of the demographic characteristics are followed by detailed summary tables. Part I of the tables contains data on population, density, the tribal population, and sex, age, and civil status by states. The remaining sections are: Part II. Education; Part III. Nationality and place of birth; Part IV. Religion; Part V. Vaccination and mental and physical defects; Part VI. Economic activities; Part VII. Urban, sub-urban, and rural population and in localities of more than 500 inhabitants; Part VIII. Health data.

EUROPE

1733. Bourgeois, Jean.

The demographic situation. (La situation démographique.) Population 2(1): 129-148. Jan.-March, 1947.

Part I discusses vital statistics for France, 1946, and gives some international comparisons; Part II reviews the demographic trends for Switzerland presented in the "Mouvement de la population en Suisse, 1943-1944," published by the Swiss Bureau of Statistics. (See Title 1769, this issue.)

Austria

1734. Austria. Statistisches Zentralamt.

Statistical News. (Statistische Nachrichten.) Vol. 1, No. 1, Sept. 25, 1946. Wien, 1946-.

Die Bevölkerung Österreichs nach dem Stande vom 21. Juli 1946. 1(1):2. Sept., 1946.

Die Bewegung der Bevölkerung im Jahre 1945 und im ersten Halbjahr 1946. 1(1):3. Sept., 1946.

Die Ehelösungen im Jahre 1945. 1(3):52. Nov., 1946.

Die natürliche Bevölkerungsbewegung in Österreich in den Jahren 1938-1944. 1(3): 54-55. Nov., 1946.

Die Altersaufbau der Bevölkerung von Wien. 1(4):88-89. Dec., 1946.

Die Lebendgeborenen im Jahre 1945. 2 (1):17-19. Jan., 1947.

Eheschliessungen, Geborene und Gestorbene in Österreich in den Jahren 1937-1946. Schaubild. 2(2):44. Feb., 1947.

Internationale Geburtenstatistik. 2 (4):64. April, 1947.

Die Todesursachen 1945. 2(4):65. April, 1947.

Die Sterbefälle 1945. 2(5):97. May, 1947.

See also Title 2110, this issue.

1735. Ilešič, Svetozar.

Belgium

1736. Belgium. Institut National de Statistique.

The demography of Belgium, 1940-1945. (Démographie de la Belgique de 1940 à 1945.) Bruxelles, Imprimerie Fr. Van Muysewinkel, 1947. 72 pp.

Contains detailed tables showing for 1940-1945: population by province and arrondissement and by linguistic regions; births, deaths, and migration, by arrondissement; marriages and divorces; distribution of live births by age of mother; deaths by age and sex; causes of death; and infant mortality by arrondissement. There are also tables giving total population by age and sex for 1900, 1910, 1920, 1930, 1939, and 1945.

1737. Belgium. Institut National de Statistique.

Movement of the population during 1946.

(Mouvement de la population au cours de l'année 1946.) Bulletin de Statistique 33(4):351-359. April, 1947. [Births, deaths, and natural increase for the legal population, 1931-1946, inclusive, by province and arrondissement.]

Vital statistics during January, 1947. (Mouvement de l'état civil en janvier 1947.) Ibid. 33(4):360-362. April, 1947. [Vital rates for the de facto population are given for 1900, 1910, 1920, 1930, and each year from 1931-1946.]

1738. Belgium. Institut National de Statistique.

General censuses of population, industry and agriculture carried out in Belgium since 1846. (Les recensements généraux de la population, de l'industrie et de l'agriculture effectués en Belgique depuis 1846.) Bulletin de Statistique 33(5):490-493. May, 1947.

Ch. III, "Le recensement de la population de 1856," contains a description of the scope and the published results of the census.

For reference to Chapters I and II, see 13(3):1203.

1739. Belgium. Institut National de Statistique.

Official statement of the size of the population of Belgium, December, 1945. (Relevé officiel du chiffre de la population du Royaume à la date du décembre 1945.) Bruxelles, Moniteur Belge 40. Aug. 4, 1946. 26 pp.

1740. Belgium. Office Central de Statistique.

The demography of Belgium from 1921 to 1939. Ch. IX. Population projections. (Démographie de la Belgique de 1921 à 1939. Ch. IX. Prévisions de population.) Bruxelles, Imprimerie Fr. Van Muysewinkel, 1945. Pp. 275-283.

The population is projected at five-year intervals in five-year age groups, 1940-1980, on the basis of the age distribution of Dec. 31, 1930, the life table of 1928-1932, the age-specific fertility of 1939, and the death statistics and annual number of births, 1931-1939. The projections are based on an estimated population as of the end of 1939 which ignores migration after 1930.

Computations are presented for the total population without regard to sex for Belgium, the Flemish population, the Walloon population, and the arrondissement of Bruxelles.

Data of the census of 1945 are utilized in the population section.

France

1744. Bourgeois, Jean.

Development of the French population from 1939 to the end of 1944. (Evolution de la population française de 1939 à la fin de 1944.) Cahiers de la Fondation Française pour l'Etude des Problèmes Humains, No. 4, pp. 97-118. Nov., 1945.

1745. Bourgeois, Jean.

The demographic situation. (La situation démographique.) Population 2(2): 329-347. April-June, 1947.

I. Recensement du 10 mars 1946; II. Recensement des étrangers de 1945; III. Mouvement naturel de la population.

1746. France. Direction de la Statistique Générale.

Statistics of population movement. Part I. Marriages, divorces, births, deaths. New Series, Vol. XX, 1943. (Statistique du mouvement de la population. Première Partie. Mariages, divorces, naissances, décès. Nouvelle Série, Tome XX, Année 1943.) Paris, Imprimerie Nationale, 1946. lxxv, 81 pp.

1747. France. Institut National de la Statistique et des Etudes Economiques.

Vital statistics in 1946. (Mouvement de la population au cours de l'année 1946.) Bulletin de la Statistique Générale de la France 35(4):245-253. April, 1947.

Marriage, birth, death, and infant mortality rates for 1939-1946. Includes vital statistics by arrondissements for the third quarter of 1946.

1748. Szajkowski, Zosa.

The growth of the Jewish population of France: The political aspects of a demographic problem. Jewish Social Studies 8 (3):179-196; 8(4):297-321. July and Oct., 1946.

Historical survey of trends of births, deaths, and population growth of the Jews in France prior to the twentieth century.

Germany

1749. Germany. Deutsche Verwaltung für Statistik in der Sowjetischen Besetzungszone.

Population balance, 1945. (Bevölkerungsbilanz, 1945.) Statistische Praxis 1(2):21-22. Nov., 1946. [The Soviet Zone of Germany.]

Census of Oct. 29, 1946....(Volkszählung um 29. Oktober, 1946. Auf dem Wege zur ersten deutschen Bevölkerungsbilanz nach dem Kriege.) Ibid. 1(1):3-4. Oct., 1946. [R.I.I.S. 14(1-4).]

1750. Ledermann, Sully.

The German population: present condition and prospects. (La population allemande: situation actuelle et perspectives.) Population 2(1):81-92. Jan.-March, 1947.

Part I, "La population actuelle," gives the population in the four Zones and in Berlin according to the census of October 29, 1946, by sex; Part II contains an estimate of war losses; Part III, "Mouvement de la population," presents mortality, infant mortality, and birth rates for each Zone, 1946, with comparative rates for 1936-38; and Part IV, "Perspectives," examines some possible trends in the future and the influence of the First World War on the number of families.

Netherlands

1751. Netherlands. Centraal Bureau voor de Statistiek.

Population of the municipalities of the Netherlands, January 1st 1944, 1945 and 1946. (Bevolking der gemeenten van Nederland op 1 Januari 1944, 1945 en 1946.) Utrecht, Uitgeversmaatschappij W. De Haan N.V., 1947. 64 pp.

The introductory section contains data on the total population, and births and deaths by province.

1752. Netherlands. Centraal Bureau voor de Statistiek.

Population--Public health. (Bevolking--Gezondheidswezen.) Maandschrift 42(3): 190-202. March, 1947.

Pp. 198-200 contain vital rates by province for 1946.

1753. Netherlands. Centraal Bureau voor de Statistiek.

The census of population with the related census of housing of May 31, 1947. Manual for the use of municipal administrators. (Volkstelling, 31 mei 1947 annex woningtelling. Handleidung voor de gemeentebesturen.) 'sGravenhage, 1947. 79 pp.°

Poland

1754. Poland. Główny Urzad Statystyczny Rzeczypospolitej Polskiej.

General summarized population census on February the 14th, 1946. Powszechny summaryczny spis ludności z dn. 14.II 1946 R. Statystyka Polski, Seria D, Zeszyt 1. Warszawa, Robotnicza Spółdzielnia Graficzna, 1947. xvi, 108 pp.

A descriptive resume of problems and results precedes tables giving number and type of towns, population (total, men, women, and under 18, 18-59, 60+) for voivodships, voivodships and counties, and rural boroughs. There is an alphabetical index of towns and rural boroughs and an appendix of instructions and forms.

1755. Poland (Territory under German Occupation, 1939-1945). Abteilung Ernährung und Landwirtschaft. Statistisches Amt.

The food question and agriculture in the General Government for the occupied Polish territory. (Die Ernährungs- und Landwirtschaft im Generalgouvernement für die besetzten polnischen Gebiete.) Krakau, 1940. 14 vols.

Reihe B, Heft 6. Gemeindeverzeichnis und Einwohnerstand vom 1.6.1940: I Teil. Die Bevölkerung des Generalgouvernements nach Volkszugehörigkeit; II Teil. Die Bevölkerungsbewegung im Zeitabschnitt, 1931-1940; III Teil. Die Bevölkerungsdichte auf 1 qkm.

Portugal

1756. Portugal. Instituto Nacional de Estatística.

Estimation of population in intercensal years. (Cálculo da população nos anos intercensuários.) Boletim Mensal 18(1): 9-13. Jan., 1946.°

1757. Portugal. Instituto Nacional de Estatística.

Development of the Portuguese population, continent and islands, 1940 to 1950, calculated on the basis of average rates of mortality by age groups. (Evolução da população portuguesa, continente e ilhas, de 1940 a 1950, calculada com base nas taxas médias de mortalidade dos grupos de idade.) Boletim Mensal 118(5):291-294. March, 1946.

Rumania

1758. Dunăre, Nicolae M.

Conditions of living among the peasant itinerant vendors in the Capital. (Condiţiile de viaţă ale fiilor de ţărani, vânzători ambulanţi în Capitală.) Institutul Central de Statistică, Biblioteca Statistică Nr. 22. Bucureşti, 1945. 59 pp.

Includes data on various characteristics of the persons studied--age, place of origin, size of parents' families, education, etc., in Bucharest.

1759. Rumania. Institut Central de Statistique.

Statistical synopsis of Rumania, 1940. (Bréviaire statistique de la Roumanie, 1940.) Bucharest, 1940[?]. 256 pp.

ASIA

Aden

1779. Aden. Superintendent of Census.
Census of Aden 1946. First report. No place of publication, 1946. 1 p. [Population by sex and military status for major divisions.]
Interim report. Civil population of Aden by races. No place of publication, 1947. 1 p.

Burma

1780. Burma. Judicial Department. General Branch.
Resolution...[Table]. Proceedings of the Government of Burma, Judicial Department, No. 322 E41, June 17, 1941. Simla, Govt. of Burma, 1943. 2 pp.
The resolution notes the taking of the census and announces the total population. An attached table gives for each district and division the number of houses in 1931 and 1941; the provisional population, by sex, 1941; the 1931 population, by sex; change, 1931-1941, actual and per cent, total and by sex; and actual and per cent change in total population, 1921-1931 and 1911-1921.

India

1781. India. Office of the Economic Adviser.
Statistical summary of the social and economic trends in India (in the inter-war period). By S. Subramanian. Calcutta, Govt. of India Press, 1945. xiii, 41 pp.
Area and population according to sex, religion, urbanization, and occupation given for British India and Indian States; birth rates and death rates for British India; industrial labor for British India and Indian States.

Japan

1782. U.S. Department of State. Division of Geography and Cartography.
Japan. Growth of official cities, 1935-1940. Map No. 10133. Washington, 1947.

1783. U.S. Department of State. Division of Research for the Far East.

Administrative subdivisions of Japan, with appendix of 47 prefectural maps. A listing of Japanese prefectures, cities, counties, towns, and townships, giving for each the area, the population for 1940 (adjusted to 1943 boundaries), and the population for 1945, with characters, romanized names, and a code showing location on accompanying maps. All changes in civil status and names shown through November 1943. Japanese Gazetteer-Publication No. 2749, Far Eastern Series No. 19. Washington, Department of State, 1946. xiv, 652 pp. Map appendix separately paged.

Palestine

1784. Palestine. Department of Statistics.

Demography. General Monthly Bulletin of Current Statistics 12(4):185-193. April, 1947.

Population up to Dec. 31, 1946; annual marriage, birth, death, and infant mortality rates, 1942-1946, by religion; migration, 1941-1946.

1785. Palestine. Department of Statistics.

Statistical abstract of Palestine, 1944-45. Eighth ed. Jerusalem, 1946. 295 pp.

Ch. 3, "Population and vital statistics," presents data on population, by religion, 1922-1945; age distribution by religion and sex, 1926-1944; urban-rural distribution; marriages and divorces, 1935-1945; age at marriage, by religion, 1944; birth and death rates, by religion, 1922-1945; and expectation of life at birth. Ch. 4 contains data on immigration.

Turkey

1786. Tamoglée, Ali.

The density of the agricultural population in Turkey. (La densité de la population agricole en Turquie.) Revue de la Faculté des Sciences Economiques de l'Université d'Istanboul, Oct., 1944-Jan., 1945. Pp. 40-43. [Population 2(1):179.]

AFRICA

Algeria

1787. Henry, Louis.

Prospective Moslem population of North Africa. (Perspectives relatives à la population musulmane de l'Afrique du Nord.) Population 2(2):267-280. April-June, 1947.

The Moslem population of Algeria is projected to 1976 on the basis of four hypotheses as to mortality and fertility.

Kenya

1788. Kenya Colony and Protectorate. Registrar-General.

Annual report, 1945. Nairobi, Govt. Printer, 1947. 26 pp.

Vital statistics for non-natives are included.

Mauritius

1789. Mauritius and Dependencies. Census Commissioner.

Final report on the census enumeration made in the colony of Mauritius and its dependencies on 11th June, 1944. Port Louis, Govt. Printer, 1945. 127 pp.

The descriptive section includes trends, distribution, constitution, age, marital status, place of birth and nationality, occupations, religions, education, and houses of the inhabitants. Appendixes: I. Population in each locality for the different classes of the community; II. Age distribution in quinquennial periods for each class of population and each district; III. Occupations of the population in detail and in selected age groups for each district and town; IV. Rodrigues and other dependencies of Mauritius.

St. Helena Island and Ascension Island

1790. St. Helena Island and Ascension Island.

Census of population of St. Helena Island and Ascension Island, 1946. The Castle, St. Helena, Govt. Printer, 1946[?]. 12 pp.

Tables for St. Helena include: Population, marital status, religions, proportion native, marital status by age, population in districts and by religions, and male population by occupation, age, and condition.

Less detailed data are given for Ascension Island.

Spanish North Africa

1791. Spain. Instituto Nacional de Estadística.

Statistical yearbook of Spanish North

Africa, 1945. (Zona de Protectorado y de los Territorios de soberanía de España en el Norte de Africa. Anuario estadístico, 1945.) Madrid, Gráficas Sánchez, 1946. 512 pp.

Deaths. Crude death rates. Mortalité. Taux bruts de mortalité. Ibid. (7):11-16. July, 1947.
Comparable information is included in each issue of the Bulletin.

1800. U.S. Department of State. Office of Intelligence Research. Division of International and Functional Intelligence.
World population estimates. OIR Report No. 4192. Washington, 1947. 48 pp.

III: MORTALITY

General

1801. Alexa, I., and Anghelescu, Cantemir.
Rumania's fundamental problems in rural public health. (Problemele fundamentale ale sănătătii publice rurale din România.) In collaboration with I. Polovrăgeanu and August Stefănescu. Bucureşti, Tipografia "Presa" Calea Plevnei, 1946. 260 pp.
Part I, "The nature of the rural population's sanitary problems," consists of three sections: statistical data on mortality, including general mortality rates for Rumania, 1907-1945, causes of mortality, and infant mortality; morbidity data; and the demographic balance, which includes birth and death rates, 1910-1945, for the rural, urban, and total population. Part II discusses "The organization and function of the rural sanitary service," with a section on the socio-economic factors affecting health; and Part III considers "Planning for the future." There is an English summary of the book, pp. 229-252, and an extensive bibliography, pp. 253-260.

1802. Aujaleu, E., and Boulenger, Dr.
Tuberculosis in France since 1938. (La tuberculose en France depuis 1938.) Office International d'Hygiène Publique, Bulletin Mensuel 38(7-8-9):573-596. English, pp. 597-615. July-Aug.-Sept., 1946.
Tuberculosis mortality in France since 1938, total, in various Départements, and by age and sex; morbidity and endemicity since 1938. Departmental maps are presented.

Environmental influences on the number of births and on the sex ratio at birth. (Umwelteinflüsse auf Geburtenzahl und Knabenüberschuss.) Archiv der Julius Klaus Stiftung 18(3-4):714-718. 1943.
Considers such factors as war and mobilization, illegitimacy, and the position of the sun and the moon. [B.A. 21(2):281.]

1861. Joint Committee of the Royal College of Obstetricians and Gynaecologists and the Population Investigation Committee.

A survey of childbearing in Britain. Prepared by J. W. B. Douglas and Griselda Rowntree. Population Studies 1(1):99-136. June, 1947.

A preliminary report on a questionnaire inquiry on the social and economic aspects of childbearing among six different occupational groups. After discussing the aims and methods of the survey and the adequacy of the sample, the report considers the characteristics of the groups, and the social class differences in the costs of pregnancy and the availability of maternity services. Differences in prenatal and postnatal care, circumstances of confinement, and expenditures connected with childbearing are analyzed.

1866. Sauvy, Alfred.
Anglo-Saxon Malthusianism. (Le malthusianisme anglo-saxon.) Population 2(2): 221-242. April-June, 1947.
The regulation of human reproduction by means of birth control is related to economic restrictions under capitalism in this general discussion of Malthusian trends in England, the United States, and the Dominions. The decline of fertility in these countries is considered and some economic implications of this decline are pointed out.

1867. Sutherland, Ian.
The still-birth rate in England and Wales in relation to social influences. Lancet 251:953-956. 1946.
A study of the effect upon the still-birth rate of such socio-economic factors as unemployment, low pay, and overcrowding. [C.D.A.B. 21(1-2):22.]

1868. Tietze, Christopher.
Human fertility in Puerto Rico. American Journal of Sociology 53(1):34-40. July, 1947.
An analysis of trends in fertility in Puerto Rico and a description of governmental and private measures being taken to reduce population pressure.

1869. Titmuss, Richard M., and Grundy, Fred.
Childlessness and the small family: a fertility survey in Luton. Lancet 251: 678-690. 1946.
"The data are based on 3,803 women married once and living with their husbands. There was no evidence of an increase in the proportion of childless marriages over 3 generations....There was a distinct trend toward smaller family size which continued during the war despite a rise in the birth and reproductive rates." [C.D.A.B. 21(1-2):42.]

1870. U.S. Bureau of the Census.
Population. Differential fertility, 1940 and 1910. Fertility by duration of marriage. Based upon tabulations from the Sixteenth and Thirteenth Censuses of the United States: 1940 and 1910. Washington, Govt. Printing Office, 1947. vi, 338 pp.
"This report presents statistics on the lifetime fertility of women with unbroken marriages, for native whites and Negroes 15 to 74 years old in the United States, according to social and economic characteristics of the woman and her family.... Women with unbroken marriages...are classified according to duration of marriage, age, and number of children ever born, in relation to education of the woman...and employment status and occupation of the husband. Statistics are presented for the United States, urban and rural, and for regions. In addition, supplementary statistics for women of each marital status are presented for the United States as a whole...."

The probability of marriage and divorce. (Om risken för äktenskap och skilsmässa.) Social-Medicinisk Tidskrift 23(5):96-104. May, 1946.°

1877. Faris, Robert E. L.
Interaction of generations and family stability. American Sociological Review 12(2):159-164. April, 1947.
General discussion of the values to be gained from family transmission of cultural, technical, and practical knowledge, and of the present breakdown in family succession.

1878. Fisher, Jacob.
Earners and dependents in urban families in relation to family income. Social Security Bulletin 10(4):10-18. April, 1947.
This study of family composition and income relationships, based on 1940 census data, analyzes the relation of income to number of earners and primary dependents and points out the implications of these relationships for a social insurance system paying dependents' benefits.

1879. France. Institut National d'Etudes Démographiques.
Living conditions of families. Expenditures of 1,080 families in March and June, 1946. (Les conditions d'existence des familles. Les dépenses de 1,080 familles en mars et juin 1946.) Population 2(2):243-266. April-June, 1947.
Preliminary results of a study of living conditions being conducted by the Institut National d'Etudes Démographiques. The results of two inquiries made in Paris in 1946 on family budgets are presented in tables. The families have been classified by the occupation of the head of the family and by number of children.

1880. Hajnal, J.
Aspects of recent trends in marriage in England and Wales. Population Studies 1 (1):72-98. June, 1947.
"Section 1 of this paper brings out certain features of the marriage habits of men and women as they may be studied by means of nuptiality tables based on the marriage-rates of certain selected years.

Section 2 studies the history of marriage-rates between the two wars, year by year. Section 3 deals with some considerations bearing on the probable course of marriage-rates in the future. Section 4 discusses the influence of the sex structure of the population on the relation of male and female marriage-rates. Section 5 discusses how far estimates of the prospects of future population growth are altered by studying rates based on men rather than rates based on women."

1890. Chamberlain, J. P.
The fate of refugees and displaced persons. Proceedings of the Academy of Political Science 22:192-202. Jan., 1947.

1891. Davie, Maurice R., et al.
Refugees in America. Report of the Committee for the Study of Recent Immigration

from Europe. New York, Harper and Bros., 1947. xxi, 453 pp.

The Committee for the Study of Recent Immigration from Europe, organized under the chairmanship of Alvin Johnson, undertook "a nation-wide study of a contemporary immigration movement, comprehensive in scope, and involving field surveys and the collection of firsthand materials." Over 200 agencies, located in 41 states and the District of Columbia, cooperated. Original data included general and special questionnaires, case studies, life history documents, community surveys, interviews, and reports of informers and participant observers. Questionnaires were distributed either in person or by mail on the basis of a sample from the files of the refugee organizations, enrollments in English and citizenship classes, personal reports, etc. Some 50,000 questionnaires were sent out, though a large number were unclaimed because of change of address. Some 11,000 were returned which were sufficiently complete to be used.

The present report is comprehensive in scope, as is indicated by the chapter headings: Conditions causing flight; Extent and characteristics of the refugee movement; What the refugees think of America; The distribution of refugees in the United States; Problems of arrival; Assisting the refugee; The problem of economic adjustment; Occupational adjustment of the refugees; Factors in their social adjustment; Their social and cultural adjustment; Organized life of the refugees; The refugees as citizens; Young refugees; Businessmen and manufacturers; Physicians; Lawyers; Professors and scientists; Artists and writers; Other professions; What Americans think of the refugees; and. Solution of the refugee problem and its international aspects.

A study of expenditure patterns of Calcutta middle class family budgets. Sankhyā, The Indian Journal of Statistics 7 (4):425-428. July, 1946.

2012. Puerto Rico. Department of Labor, in cooperation with the United States Bureau of Labor Statistics.
Incomes and expenditures of wage earners in Puerto Rico. By Alice C. Hanson and Manuel A. Perez. Bulletin No. 1. May 1, 1947. 152 pp.
"This report presents the major findings of an Island-wide survey of incomes and expenditures of families of wage earners in Puerto Rico." Since the field work was carried on in 1941 and the early part of 1942, the survey describes prewar conditions and provides "a basis for judging the effect of wartime and postwar price and employment changes upon Puerto Rican workers' living standards." A summary of the findings is followed by 38 tables presenting the detailed data. Pp. 73-152 contain an "Appendix on procedures," which includes a discussion of the sample covered, description of the schedules and forms used, and detailed instructions to the field agents.

2013. Rumania. Institutul Central de Statistică.
Agriculture in the District of Arges. Results of the agricultural census of 1941. (Agricultura din judeţul argeş. Rezultate ale recensământului agricol din 1941.) By Roman Cresin. Biblioteca Statistică Nr. 11. Bucureşti, 1945. 62 pp.
Includes data on the agricultural population by sex.

Labor force estimates: July, 1945, to February, 1947. The Labor Force Bulletin, No. 7, April, 1947. 13 pp.

"This bulletin is the seventh in a series issued to supplement and extend the summary information released each month in the Monthly Report on the Labor Force ....Tables in this issue...present estimates of the civilian population classified by employment status, age and sex, and data on occupation, class of worker, and hours worked during the survey week, for the period from July, 1945, to February, 1947. Also included are estimates of the duration of unemployment of unemployed persons. In the future, the series shown in this bulletin will be brought up to date each month in a special supplement which will be issued as soon as possible after the publication of the Monthly Report on the Labor Force.

"A later issue of The Labor Force Bulletin will show estimates extending back to the beginning of the survey in March, 1940, which have been adjusted to take account of the improved interviewing techniques introduced in July, 1945."

Labor force definition and measurement. Recent experience in the United States. Prepared by Louis J. Ducoff and Margaret J. Hagood for the Subcommittee on Labor Force Statistics of the Committee on Labor Market Research. New York, 1947. x, 134 pp.
"The first objective of this monograph is to increase understanding of the problems relating to adoption of a common set of concepts among the several groups of persons who produce or use labor force statistics. Hence, an exposition of labor force concepts and measurement techniques in current use is presented along with a critical examination of the present status of current national labor force statistics. The second objective is to explore further steps in the refinement and improvement of labor force measurement which would serve various needs in periods of different national income and employment levels. A third objective is to formulate specific problems in labor force concepts and measurement on which research effort should be focused."
The major report considers the labor force as currently defined and measured, differentiation of the labor force, and labor force dynamics.
The following appendixes are included:
A. Durand, John D. Development of the labor force concept, 1930-40.
B. Wood, Loring. Statistical data on employment and unemployment from sources other than labor force surveys.
C. Palmer, Gladys L., and Ratner, Ann. Use of population census data in the preparation of estimates of labor force and employment in a metropolitan area.

2106. U.S. Bureau of the Census. Sampling Staff.

A chapter in population sampling. Washington, Govt. Printing Office, 1947. iv, 141 pp.

This monograph contains "a description of a method for sampling blocks and subsampling households from the sample blocks, along with the appropriate sampling theory for attaining the maximum precision in the population count for a given allowable cost. The particular application treated here is the so-called sample census of congested areas (1944)."

Contents: Part I. Description (Statement of the problem, the sample design, the preparation of estimates from the sample); Part II. Theory (Notation, assumptions, formula for estimating the population, variance of the estimated population, optimum allocation of the sample, advance estimates of the variances, numerical illustrations, and evaluation of the sampling error from a subsample of the returns); Appendixes (A. Excerpts from the instructions; B. Facsimiles of the listing forms and the schedule for enumeration; C. Memorandum on the formula for inflation; D. An example of the published tables).

2107. Vincent, Paul.

An interesting application of the triangular diagram. (Une interessante application du diagramme triangulaire.) Population 2(1):159-165. Jan.-March, 1947.

A summary of: Guilbaud, Georges Th. Une méthode d'analyse sommaire de la structure démographique. Economie et Humanisme 5: 515-525. Sept.-Oct., 1946. (See 13(3): 1624.)

2108. Vincent, Paul.

Nomograms for the determination of significant differences between two rates. (Nomogrammes pour la détermination des différences significatives entre deux taux.) Population 2(2):313-322. April-June, 1947.

NOTES TO TABLES 1 - 3

Table 1. Additional Data on Population Growth

† Approximate.

J/ De jure population. Specified only when both de facto and de jure populations are available.

a/ Presents only data received more recently than those given in Population Index 13(3).

b/ Includes only those countries in which the last census was taken in 1900 or later, and in which there are at least 500 thousand inhabitants.

c/ Computed on the assumption of constant rate of growth during the period.

d/ Rate applies to last intercensal period.

e/ Excluding tribal Indians, estimated at 100,600 in 1941.

f/ Area as of date.

g/ Excluding 40 thousand prisoners of war.

h/ Territory according to the Treaty of Craïova.

i/ Territory as delimited by the Treaty of Trianon and confirmed by the Armistice of January 20, 1945.

j/ Excluding Venezia Giulia and Zara.

k/ Excluding Bessarabia, Northern Bukovina, and Southern Dobrudja, but including Northern Transylvania.

m/ Excluding members of His Majesty's Forces (estimated at 2,500 at the time of the 1931 Census), but including the nomadic population estimated at 66,553, all Moslems, at the Census of 1931 and continued as a constant estimate.

n/ Including an estimate of 50 thousand nomads.

o/ Excluding aboriginals, estimated to number about 60 thousand.

1/ Unless otherwise noted, figures were taken from: League of Nations. Statistical Year-book, 1942/44, Table 2; and United Nations. Statistical Office of the United Nations. Monthly Bulletin of Statistics, No. 8, pp. 1-4. Aug., 1947.

2/ Brazil. Instituto Brasileiro de Geografia e Estatística. Recenseamento Geral do Brasil, 1.° de Setembro de 1940. Sinopse do censo demográfico: Dados gerais. Rio de Janeiro, Serviço Gráfico do Instituto Brasileiro de Geografia e Estatística, 1946. P. 1.

3/ United Nations. Monthly Bulletin of Statistics 27(11):477. Nov., 1946.

4/ Palestine. Department of Statistics. General Monthly Bulletin of Current Statistics 12(4):185. April, 1947.

5/ Australia. Commonwealth Bureau of Census and Statistics. Quarterly Summary of Australian Statistics. Bulletin No. 187, p. 3. March, 1947.

Table 2. Additional Vital Rates

* Provisional.

† Approximate.

a/ Presents only data received more recently than those given in Population Index 13(3).

b/ Excluding the states of Massachusetts and Connecticut.

c/ Excluding infants born alive but dying before registration of births.

d/ Excluding jungle population.

e/ Territory according to the Treaty of Craïova.

f/ Bohemia, Moravia, Silesia, and Slovakia.

g/ Area as delimited by the Treaty of Trianon and confirmed by the Armistice of January 20, 1945.

h/ Excluding Venezia Giulia and Zara.

i/ 1944: excluding Bessarabia, one-half Bukovina, two-thirds Transylvania, and part of Crisana; 1945-1946: excluding Bessarabia, Northern Bukovina, and Southern Dobrudja

j/ Base population includes armed forces and merchant seamen at home and abroad.

k/ Registration area only.

m/ Japanese only.

n/ Data for settled population, excluding nomads.

o/ European population only.

p/ Excluding aboriginals.

1/ Unless otherwise noted, figures were taken from: United Nations. Statistical Office of the United Nations. Monthly Bulletin of Statistics, No. 8, pp. 9-11, 15-17, and 20-21. Aug., 1947.

2/ Belgium. Institut National de Statistique. Bulletin de Statistique 33(4):362. April, 1947.

3/ Czechoslovakia. Státní Úřad Statistický. Statistický Zpravodaj 10(7-8):279. July-Aug., 1947.

4/ Netherlands. Centraal Bureau voor de Statistiek. Maandschrift 42(3):198. March, 1947.

5/ England and Wales. Registrar-General. Quarterly return: Births, deaths and mar-

Table 2. Additional Vital Rates (Continued)

riages registered in the quarter ended 31st March, 1947, and the year, 1946....No. 393, pp. 1 and 14. London, H.M. Stationery Office, 1947.

6/ Scotland. Registrar-General. Births, deaths and marriages registered in the quarter ended 31st December, 1946. Also preliminary return for the year 1946. No. 368. Edinburgh, H.M. Stationery Office, 1946. 28 pp.

7/ Palestine. Department of Statistics. General Monthly Bulletin of Current Statistics 12(4):187. April, 1947.

8/ Australia. Commonwealth Bureau of Census and Statistics. Quarterly Summary of Australian Statistics, Bulletin No. 187, pp. 5-6. March, 1947.

9/ New Zealand. Census and Statistics Department. Monthly Abstract of Statistics, April, 1947. P. 5.

Table 3. Birth, Death, and Infant Mortality Rates for Geographic Divisions of the United States

a/ Rates for 1936-1940 are based on place of occurrence; rates for 1941-1945, on place of residence. For 1940-1945, the annual birth rates for the United States are based on total population including armed forces overseas; for each geographic division, on the civilian population. For 1940-1945, the annual death rates for the United States are based on the population excluding armed forces overseas; for each geographic region, on the total population in the area.

b/ Rates for 1936-1940 are based on place of occurrence; rates for 1941-1945, on place of residence.

1/ Birth and death rates for 1936-1940 were secured from: U.S. Bureau of the Census. Vital Statistics of the United States, 1944. Part I. Washington, Govt. Printing Office, 1946. Tables I and II, pp. 3 and 5. Rates for 1941 were taken from: U.S. Bureau of the Census. Vital Statistics—Special Reports 25(1):17 and 18, March 27, 1946; rates for 1942-1945, from U.S. National Office of Vital Statistics. Vital Statistics--Special Reports 27(1):6 and 7, May 14, 1947.

2/ Rates for 1936-1940 were secured from: U.S. Bureau of the Census. Vital Statistics of the United States, 1944. Part I. Washington, Govt. Printing Office, 1946. Table III, p. 7. Rates for 1941 were computed from data in: U.S. Bureau of the Census. Vital Statistics--Special Reports 25(1):17, March 27, 1946; and U.S. National Office of Vital Statistics. Vital Statistics--Special Reports 25(16):307, Dec. 4, 1946. Rates for 1942-1945 were taken from: U.S. National Office of Vital Statistics. Vital Statistics--Special Reports 27(4):50. Aug. 19, 1947.

INDEX OF COUNTRIES

NORTH AMERICA

North America - 1401.
Alaska - 662, 800, 1160, 1463.
Aleutian Islands - 267, 361.
Bahamas - 631.
Barbados - 669, 1798.
Bermuda - 632.
British Honduras - 1161, 1798.
British Virgin Islands - 670.
British West Indies - 378, 985, 1501.
Canada -
General - 1125.
Formal Demography - 59, 60, 633- 637, 745, 1162- 1164, 1187, 1697- 1699.
Mortality - 185, 752, 1290, 1308, 1341, 1817.
Fertility - 244, 833, 1358, 1363.
Marriage, Divorce, and the Family - 1382, 1882, 1883.
Migration - 280, 286, 287, 294, 336, 337, 351, 352, 355, 356, 850, 865, 873, 890, 1403, 1411, 1422, 1433, 1907, 1930, 1933, 1947.
Characteristics - 384, 430, 442, 461, 1001, 1546, 1990- 1992, 2055, 2056, 2066.
Policy - 494, 495, 502, 1045, 1604.
Administration and Method - 526, 528.
References and Compendia - 572.
Cayman Islands - 360, 1702.
Central America - 754, 833, 2122.
Costa Rica - 638, 1422.
Cuba - 462, 1066, 1093, 1165, 1501, 1616, 1639, 2058.
Dominican Republic - 906, 1422, 1501, 1700.
Greenland - 164, 344, 904, 911, 1479, 2065.
Guadeloupe - 921.
Guatemala - 214, 639, 640, 1065, 1477.
Haiti - 1501.
Honduras - 1701.
Jamaica - 1702, 1798.
Leeward Islands - 670.
Martinique - 160, 1703.
Mexico - 35, 172, 307, 427, 542, 584, 587, 589, 609, 641, 642, 770, 776, 785, 795, 810, 872, 879, 981, 1166, 1422, 1557, 1581, 1934, 1969, 2122.
Netherlands West Indies - 1478.
Newfoundland - 354, 368, 765, 1523.
Nicaragua - 61, 1167, 1168, 1453.
Northeast America - 1134.
Northwest America - 267.
Panama - 41, 856, 1169.
Panama Canal Zone - 62, 802, 1294, 1296- 1298.
Puerto Rico - 63, 643- 645, 662, 663, 1447, 1501, 1689, 1853, 1868, 1931, 1996, 2012.
St. Pierre and Miquelon - 160.
Salvador, El - 646, 647, 1170.
Trinidad - 935.
Turks and Caicos Islands - 1702.
United States -
General - 13, 23, 27, 37, 43, 53, 594, 601, 617, 620, 626, 1117, 1122, 1125, 1136, 1140, 1156, 1157, 1159, 1662, 1676, 1687, 1696.
Formal Demography - 65- 68, 70- 77, 159, 650, 653, 654, 656, 657, 659- 661, 663- 667, 745, 1174, 1175, 1177, 1179, 1181- 1189, 1706- 1720.
Mortality - 161, 162, 171, 175, 180, 186, 190, 193, 201, 202, 204, 208, 211, 222, 225, 749, 775, 778, 791, 796, 797, 799, 801, 807, 813, 1280, 1288- 1290, 1292, 1303, 1304, 1308, 1310, 1312, 1314, 1321- 1323, 1325- 1327, 1332, 1338, 1343, 1344, 1806, 1817, 1821, 1823, 1825, 1827, 1832, 1841, 1845, 1847.
Fertility - 236, 240, 244, 247, 833, 835, 1352, 1358, 1367- 1370, 1848, 1851, 1858, 1864, 1866, 1870.
Marriage, Divorce, and the Family - 250, 256, 261- 263, 842, 846, 847, 1372, 1375, 1377, 1379, 1380, 1382, 1385, 1389- 1392, 1877, 1878, 1883, 1888, 1889.
Migration - 295- 297, 303, 307, 308, 313, 329, 331, 332, 855, 869, 874, 876, 885, 886, 899, 903, 912, 916, 917, 1409, 1411, 1413, 1419, 1422, 1425, 1426, 1429, 1430, 1435, 1437, 1438, 1440, 1445, 1446, 1452, 1891, 1898, 1899, 1902, 1903, 1908- 1910, 1912, 1913, 1917, 1926, 1929, 1933- 1936, 1940, 1942- 1945, 1950, 1957.
Regional Studies - 926, 1972.
Characteristics - 415, 417- 424, 426, 430, 447, 455, 457, 460, 470, 471, 475, 477- 480, 485, 488, 491, 492, 972, 976, 978, 989, 991- 993, 1006, 1009, 1011, 1017, 1030, 1031, 1037, 1503, 1504, 1509, 1512, 1514, 1525, 1526, 1528- 1536, 1538, 1543, 1555, 1568,

Characteristics (Cont.)
1587, 1984, 2007, 2008, 2010, 2018, 2020, 2023- 2035, 2059, 2071, 2072.
Policy - 503, 504, 512, 519, 520, 1603, 1605.
Administration and Method - 524, 527, 531, 535, 540, 545, 551, 556, 565, 1067, 1069, 1071, 1080- 1083, 1087, 1088, 1609, 1611, 1612, 1615, 1617, 1620, 1630, 2092, 2093, 2098, 2101, 2103, 2105, 2106.
References and Compendia - 579, 580, 1091, 1092, 1096, 1101, 1103, 1105- 1109, 1631, 1641, 1653, 1655, 1656, 2119, 2125- 2127.
Regions:
East - 1134, 1558.
New England - 1371, 1873.
Northwest - 1005, 1457, 1560.
Pacific Coast - 454, 902, 1527.
South - 397, 409, 648, 840, 988, 1176, 1693.
Southeast - 414, 464.
West - 891, 1172.
States:
Alabama - 79.
California - 357, 401, 493, 649, 651, 1038, 1332, 1445, 1527, 1564, 1953.
